

DAVID CALLAN

Vice President and Partner with McGuire Engineers, Inc.

David is Vice President and Partner with McGuire Engineers, Inc., a design, engineering and consulting firm serving the greater Chicagoland area. McGuire Engineers Inc. (MEPC) specializes in full range of in-house engineering services including mechanical, electrical, plumbing, sprinkler and life safety systems. While David's career is centered on the built environment and sustainable design, his college career started with a performing arts scholarship to the University of Maryland for voice. David comes from a family that made music and the arts an important part of their everyday lives and continues the tradition with his wife and their two daughters. David is grateful to have been introduced to Little Kids Rock through his professional association with Dick Hoffman and Steve Stachorek. The mission of Little Kids Rock resonates with David because of his experience attending inner-city schools in Baltimore where music education was a luxury not afforded. David would like to help less fortunate children, who otherwise would not have the opportunity for music, and the arts, to enrich their lives. In his spare time, David is guitarist and singer/songwriter active in the Chicago folk and Americana music scene who performs at folk festivals and local events, and hosts a monthly community song circle. David is also proud to serve as a board member of a local folk music preservation non-for-profit organization.
